containers in CA+PET

> containers in cardboard (CA) + polyethylene terephthalate (PET)

Our cardboard trays are produced from pure cellulose fiber coated with polyethylene terephthalate (PET) to make them waterproof and greaseproof.

The containers in CA+PET are thermo-sealable and are a paramount element of the COMPAC SYSTEM together with the tray sealers and the sealing film reels.

Are available containers generic printing instructions for use "multilingual" in Italian/English/French/German/Spanish. On request the containers can be customized (brands and logos, texts, colours).

RECYCLABLE CONTAINERS WITH PAPER – ATICELCA® 501 – level B

Technical properties of our containers

- good mechanical properties (abrasion resistance, flexural strength, etc ...);
- high elasticity which make them safe from breakage during handling and transport;
- excellent resistance to aggressive chemical agents, to organic and inorganic substances (including oil, fat, etc ;) and an excellent physiological behaviour (odourless, flavourless);
- suitable for reheating in microwave ovens or traditional ovens up to +200° C for 60 minutes;
- suitable for cooking by the consumer only if subsequent to the heat-sealing of the package with READY TO COOK food in a microwave ovens or traditional ovens up to + 200 °C for 60 minutes;
- suitable for frozen food down to a minimum temperature of -40° C.

To identify and facilitate material selective separation, our containers in cardboard (CA+PET) are marked with the following logo: 

They belong to the Compac line 

If collected, the containers can be recycled or incinerated.

Incineration would only produce usual compounds produced by paper and hydrocarbons combustion.
