containers in CA+PLA

> containers in cardboard (CA) + poly lactic acid (PLA)

Our containers CA+PLA are made from pure cellulose fiber coated with poly lactic acid (PLA) which makes them waterproof and greaseproof.

The containers in CA+PLA are thermo-sealable and are a paramount element of the COMPAC SYSTEM together with the tray sealers and the sealing film reels.

They are manufactured from renewable biodegradable raw materials.

Are available containers generic printing instructions for use "multilingual" in Italian/English/French/German/Spanish.

On request the containers can be customized (brands and logos, texts, colours).

They can be recycled or disposed completely in industrial composting facilities.

The containers in CA + PLA meet the criteria of the FSC® Certification System that ensures that the product is made of FSC® - certified and other controlled material, confirming the environmental and social Compac respect.

The containers in CA+PLA, **BIODEGRADABLE** and **COMPOSTABLE**, are complying with the certification standards from TÜV AUSTRIA in reference to the European norm UNI EN13432.

RECYCLABLE CONTAINERS WITH PAPER – ATICELCA® 501 – level A

They belong to the Compac line *green line*

Technical properties of our containers (☞)

- high elasticity which make them safe from breakage during handling and transport;
- excellent resistance to aggressive chemical agents, to organic and inorganic substances (including oil, fat, etc;) and an excellent physiological behaviour (odourless, flavourless);
- suitable for reheating in microwave ovens or traditional ovens up to +200° C for 30 minutes;
- suitable for cooking by the consumer only if subsequent to the heat-sealing of the package with READY TO COOK food in a microwave ovens or traditional ovens up to + 200 °C for 30 minutes;
- suitable for frozen food down to a minimum temperature of -40° C.
